SUMMARY

BS Artificial Intelligence student at UMT Lahore with 1.8+ years of hands-on experience building chatbots and applied AI projects. Comfortable across the AI stack — from conversational AI and NLP to computer vision, databases, and networking — with a track record of turning complex ideas into working, deployable solutions.

EXPERIENCE

Chatbot Developer *January 2025 – Present (1 year 8 months)*

Punjab, Pakistan

- Configure conversational flows and AI models, define chatbot purpose and persona, and build knowledge bases from FAQs and documents.
- Deploy chatbots across websites and messaging platforms, tuning them for accurate, context-aware responses.

CodeAlpha Internship *July 2026*

1. Language Translation Tool — CodeAlpha Internship *Jul 2026*

Python · Tkinter · deep-translator (Google Translate) · Multithreading

- Built a desktop translation app supporting 26 languages with auto-detect, one-click language swap, clipboard copy, and text-to-speech; kept the UI responsive by running all translation requests on a background thread.

2. FAQ Chatbot — CodeAlpha Internship

Python · NLP · Chatbot Design

- Developed a chatbot that answers frequently asked questions with contextual awareness, delivering accurate responses from an FAQ knowledge base.

3. Object Detection & Tracking

OpenCV · Deep Learning · Computer Vision

- Implemented a real-time object detection and tracking system for video and image analysis using deep learning models.

PROJECTS

Object Detection & Tracking

OpenCV · Deep Learning · Computer Vision

- Implemented a real-time object detection and tracking system for video and image analysis using deep learning models.

Mental Health Agent

AI Agent · Healthcare · Decision Support

- Designed an AI agent focused on mental-health access, emergency counseling response, and hospital decision support.

Bank Management System

SQL · Relational Database Design

- Built a SQL-based system managing customer records, accounts, loans, transactions, branches, and payment channels.

Inter-University Sports Tournament Database

MySQL · Data Modeling

- Designed a relational database tracking sports, teams, players, match schedules, and tournament results.

Titanic Analysis Project

Python · Exploratory Data Analysis · Data Visualization

- Performed an end-to-end analysis of Titanic survival dynamics combining EDA, visualization, and an interactive application.

Campus Network Design Simulation

Cisco Packet Tracer · Networking

- Designed and simulated a modular university campus network with a secure, scalable architecture.

Password Strength Analyzer

HTML · CSS · JavaScript

- Built an interactive web tool that evaluates password strength and gives users instant feedback for stronger passwords.

SKILLS

Languages & Tools: Python, JavaScript, HTML, CSS, SQL, MySQL, C++, Linux (I/O Redirection)

AI / ML: Machine Learning, NLP, Computer Vision (OpenCV), Deep Learning, AI Agents, Data Analysis, Model Configuration

Conversational AI: Chatbot Design & Deployment, Knowledge Bases, Conversational Flow Design

Other: Cisco Packet Tracer / Networking, Relational Database Design, Prototyping, Research

CERTIFICATIONS

- AI for Research and Insights
- AI Fundamentals
- AI for Data Analysis
- Linux: I/O Redirection for DevOps
- AI Content Creation
- AI Development

EDUCATION

University of Management and Technology (UMT)

Bachelor's Degree, Artificial Intelligence · October 2024 – July 2028

Star Group of Colleges

ICS, Computer Science · September 2022 – April 2024

Hawks School System

Matric, Science · January 2020 – March 2022
